

## White Oak Selvedge Denim Tote Bag and Wallet

Jul 16, 2016 | [New Releases](#) | by [David Shuck](#)

*Cone Mills*, the last selvedge denim maker in the United States, and their White Oak shop just got a little more accessible with their new offering of finished goods – a denim tote and wallet.

They had previously only sold raw fabric from their White Oak Plant, but now you can get your accessories directly from the source. The **Selvedge Tote** is a midweight denim tote with a zip-top and a White Oak patch; the wallet is sourced from the first run of their plant based Natural Indigo denim and will be sure to keep your green from feeling blue.

Both are available for \$125 and \$40 respectively at [Cone Mills](#).
