

Nudie Jeans Co. Dude Dan - Cone Mills 15.25oz. Natural Indigo Jeans

Feb 27, 2017 | by [Daniel Sheridan](#)

All aboard the natural indigo train! **Nudie Jeans Co.** just dropped a very limited release called the Dude Dan, which were built with none other than US-made [Cone Mills](#) natural indigo denim and all the fit and features Nudie fans love.

These Dude Dans feature a midweight 15.25oz. fabric, chock-full of that natty indigo the industry has been loving, and loving for good reason. While they may not appear as saturated as your average new raw denim jeans, the indigo itself is as rich as it naturally comes and is sure to fade just as beautifully over time. These jeans are cut in Nudie's 'Regular Fit', with a mid-rise and tapered leg for a sleek overall profile. Due to shipping restrictions, however, the Dude Dan will only be sold in the [European Economic Area](#)... sorry rest of the world.

Available for \$343 at [Oi Polloi](#).
